Angel wings

String 7 beads on either side of the string. Loop the other side of the string through the last bead.

String 6 beads.

Leave out the last bead and loop back the same string through the second last bead.

String 12 more beads.

Now this one is a bit tricky. The string is transparent, so i highlighted it with green, so that it would be easier to understand.
The string should be in between the two beads.

Now loop the string back through the last bead.

String 13 more beads. Then leave out the last one and loop back the string through the second last bead.

String 4 more beads and loop the string throught the first of the seven white beads (the body row).

Pull tightly, and the wings are done.
