

Rabbit ears

String 12 beads on either side of the string.

Leave out the last bead and loop back with the same string through the second last one.

String 10 more beads.

Loop the string through the bead of the last row the way it is shown in the picture. I hope it's clear enough. (If not, do send me a comment.)

Do the same thing on the other side. Pull tightly. Don't worry if the ears won't come close together. They will once you complete the last row: string one bead on either side of the string and loop back through it with the other side of the string. Pull tightly again. Are the ears close to each other? Perfect. Tie a knot and your rabbit is done.
