

How to make the legs of the sea turtle

(photo help)

← 1 String six beads on either side of the fishing line

2 Leave the last bead and loop the same string through the next bead (bead number 5)

3 String two more beads on the same string.

4 Loop the same string through the first bead of the leg.

5 Pull tightly, make sure the leg is as close to the body as possible.

6 Do the same thing on the other side.
